Remote Control

5. Select the Bond powered fan in the **Android** version as in the image below.
    1. Go into Wifi settings and select the Bond Config Wifi (starts with K) for **iOS**.
    2. Go back to the Bond Home application.

✕ Add new device

Nearby devices

KMKSXX10001

6. Once the BOND application connects to the fan, select **CONTINUE** to proceed.
    1. If you are asked for a pin, please enter the 4 digit pin located in the manual or press and hold Power or stop on the associated remote for 6 seconds.

7. Test the fan functions.
    1. You have the option to disable the light function if your fan does not have a light.

8. Select **YES, IT WORKS**.
9. Specific information about your fan
    1. Select **Location** and choose from one of the predefined entries or add your own by selecting OTHER. When finished select **Save**.
    2. Select **Device Name** and enter the name for your device. When finished select OK to save.
        1. Please note that this name will be used for integrations so a simple easy to remember name is best.
10. Select **Continue**.

Your hampton bay is almost ready to use, but first tell us more about it.

Location
My Room

Device Name
My Smart Kit

Hint: You will have to say the device name when use Alexa or Google home.

CONTINUE

11. Select the WiFi network you would like to connect the SBB to.
12. Enter the WiFi password and select **OK**.
13. If there is an issue with the connection, wrong password entered. You will receive an error message. Please select **OK, I've Got it**.

!

Hey, attention!

We're not sure if your setup was successful. Please, wait a little while and, if your device does not appear on the dashboard, try again.

OK, I'VE GOT IT!

    1. Start the set up process again by choosing +.
    2. You will start at step 7 to confirm the application controls the fan.
14. Once the connection is made, please select **DONE**.

15. If the SBB fan is not displayed in the BOND application, please swipe down to refresh.
